

access **PI**[®]

>>The power of the Predictive Index[®] **online.**

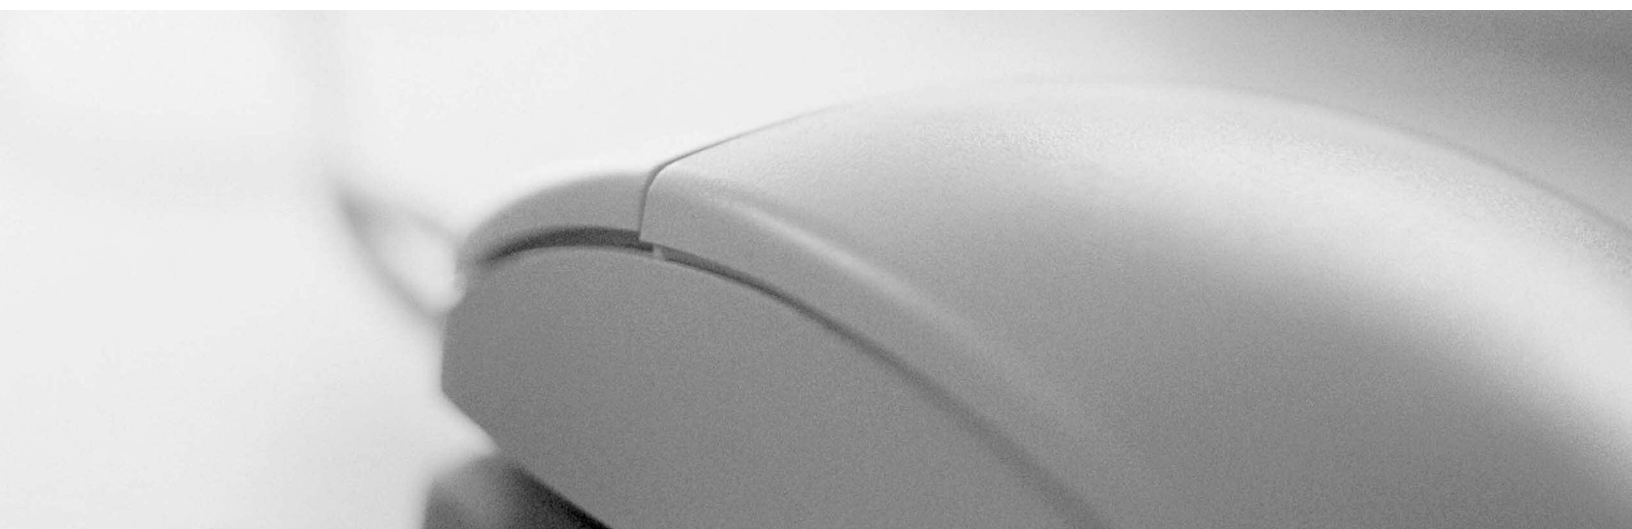

>> Make the most of your **PI information.**

accessPI is a powerful, easy-to-use software solution that brings the speed and convenience of the Web to the Predictive Index. All of your valuable PI data resides on a highly secure central server, accessible from any Web-connected computer, any time you need it. There's nothing to install, no software to maintain. All it takes is an Internet browser.

accessPI's convenience and ease-of-use extends to its secure and customizable levels of control. You have the ability to define who within your organization may have access, as well as what they can see and do within the program. And, you can select from several password management protocols to establish the level of protection that is right for your company.

accessPI is not only the most convenient way to manage your PI information; it's also the smartest. You can securely administer PI surveys and PRO job profile worksheets electronically — anywhere in the world. By eliminating geography from the recruitment equation, you can consider more candidates. And because all of your authorized users have access to the same up-to-the-minute data, wherever they happen to be, it's easier to share ideas and discuss strategies.

Using *accessPI's* powerful administrative features, you can easily sort, search, view, compare, and organize all your PI information. You'll see your data in ways never before possible, and gain valuable new insights into your organization.

A ready-for-anything network environment. *accessPI* is hosted by AT&T Enterprise Managed Hosting services in a "Class A" data center — one of the most secure and disaster-proof facilities anywhere. Round-the-clock monitoring and management of network servers, daily on-site and off-site backups, redundant routers connected to multiple high-speed links, and high speed connection points around the globe ensure the best possible worldwide performance.

PI Worldwide Web Services. *accessPI* is developed and supported by PI Worldwide Web Services which brings both experience and commitment to the mission of delivering technology solutions that enhance the value of the Predictive Index.

administer

You can securely administer PIs and PROs remotely or on-screen in multiple languages.

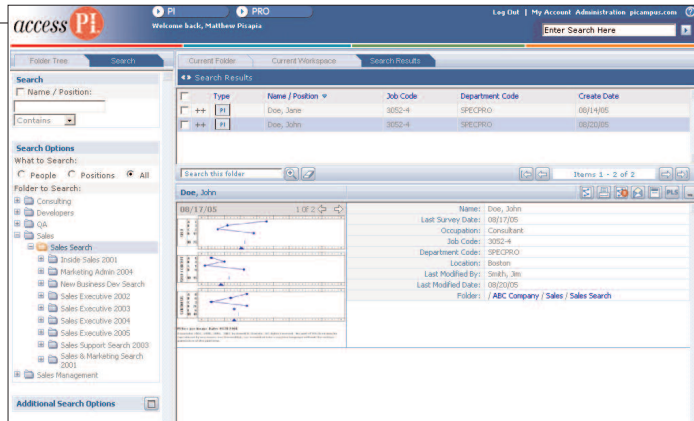

compare

accessPI's convenient, customizable workspace lets you view and compare multiple PI and/or PRO patterns simultaneously.

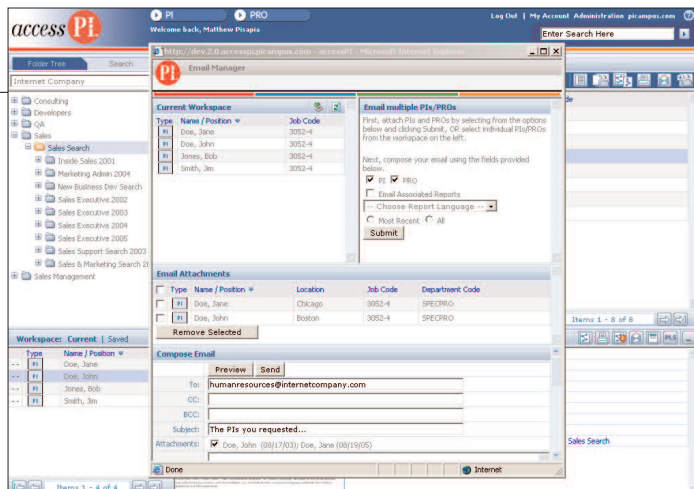

search

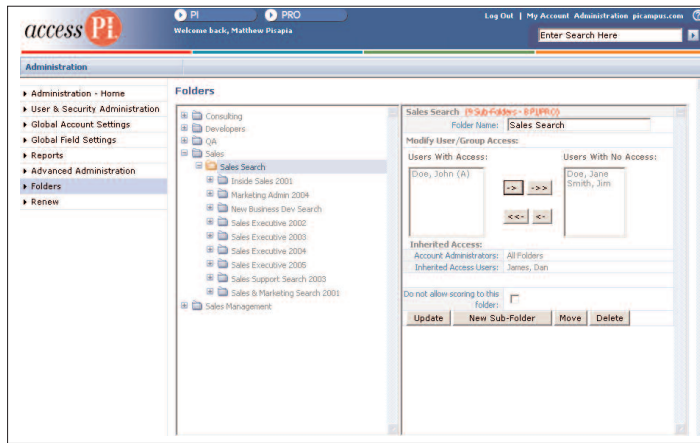

Find exactly what you're looking for, quickly and easily. Advanced query functionality lets you easily search for PIs and PROs by pattern, or any associated parameter. You can also save your searches to use again later.

share

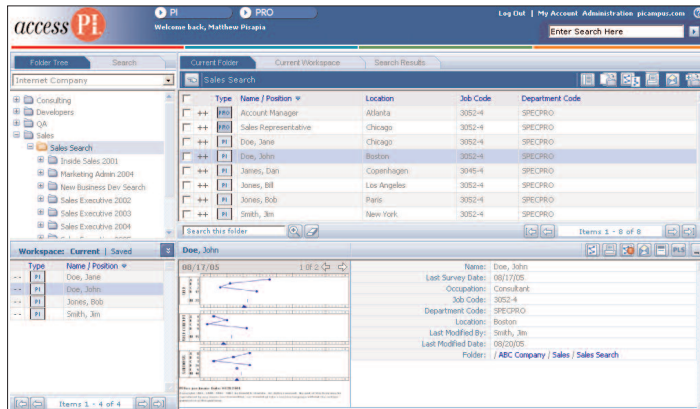

With a single click, you can print or email any combination of PIs and PROs. Download or email thumbnail images to view, share, or include in documents outside accessPI. You can also download and email PI and PRO Reports as Rich Text Format (RTF) documents, readable by most word processors.

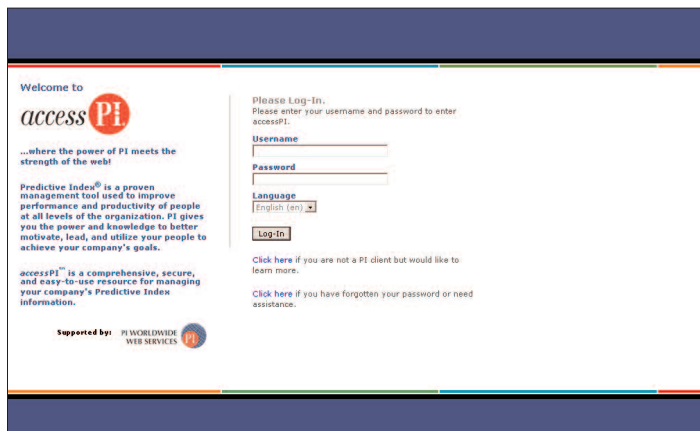

manage

You can organize your files and folders for maximum efficiency, and reorganize with just a few mouse clicks.

configure

You can customize the application to your needs by entering or importing Job Codes, Department Codes or Custom Fields to establish consistent personal and position information across your entire organization.

protect

Structure your company's PI program with comprehensive security features. Customizable access permissions let you define who may have access, as well as what they can see and do within the program. Select from several password management protocols to set the level of protection that is right for your company.

PI Worldwide Web Services is committed to the protection of our clients' private information within our Web-based applications. We therefore deploy some of the most advanced technology available today to enforce Internet security, and our online applications are certified annually under the United States Department of Commerce and the European Union Safe Harbor Principles.

>> **accessPI-CONNECT** adds PI to your own Web-based recruiting system. Especially valuable for large organizations dealing with many positions and large numbers of candidates, this optional accessPI service allows you to seamlessly integrate the PI survey process into your own HR software solution.

>> **desktopPI** for any time you can't get online. For those times when you're not able to log onto the Web, desktopPI is a downloadable, application that lets you work independently using the same interface as accessPI. Perfect for any time you don't have access to the Internet, you can easily sync up with accessPI when you reconnect.

Are you ready to take advantage of *accessPI*? To learn more about *accessPI* and how it can help you make the most of your PI information, please call us at +1-781-235-1541. We'll be happy to answer your questions and help you put the power of the Predictive Index online in your organization.
